SABELO & BS CONSTRUCTION is a 100% black owned Close Corporation founded with the intention of responding to the challenge of an existing gap in the Construction industry. We specialize in providing engineering, design and consulting services on government, educational, health care and commercial facilities, and through subcontracting with architects working on such facilities,

The company is a one-stop- shop for all construction related work which sets it's apart from other conventional contractors. Our wide product range introduces diversity in the revenue streams providing a hedge against down cycles in other products. Our multi skilled staff will allow the company to dispatch smaller work teams which are cost effective and provide added flexibility.

The services of the company include both pre-construction and post-construction activities, consulting, engineering and design services, from conceptional design through building start up, on a wide variety of facilities.

SABELO & BS CONSTRUCTION competitive is our knowledge of digital based design resources; we utilize modern technology at all phases of a project. All work is carried out using CAD software, including preliminary design and presentation work. We also use specialty design software as well as internet transfer of information between ourselves, other consultants and our clients.

The driving force of the company is to provide quality service for our clients thus, "We don't just design houses, but homes".
